SUPER PL

New Generation Accelerate Shrimp Feed

Super PL feed stands as the **first and leading accelerate shrimp feed** in Indonesia's shrimp industry, specially developed for **Super Post-Larvae (PL)** produced by STP, known as **Super PL STP**. With its premium selected ingredients and advanced formulation technology, Super PL feed delivers highly digestible essential amino acids, essential fatty acids, multi-vitamins, trace minerals, and sterols to enhance growth, robustness, and production efficiency throughout the year. It also ensures a **smooth feeding transition** for Super PL STP from nursery to grow-out pond, setting a new benchmark for sustainable and high-performance shrimp farming in Indonesia.

PV Max

Improved Formula High Nutrient for Performance Booster

PV Max is a premium shrimp feed specially formulated with high-quality marine proteins and a balanced nutrient profile to deliver consistent performance. Its advanced formula **supports gut health** by promoting efficient digestion and nutrient absorption, while also **enhancing immunomodulation** to strengthen shrimp defense against environmental stressors and disease challenges. In addition, PV MAX **boosts antioxidant capacity**, helping shrimp stay healthier and more resilient throughout the culture cycle. With this combination of functional benefits, PV Max is the trusted **performance booster** for sustainable and profitable shrimp farming.

TOV

New Formula Economical Shrimp Feed for Maintained Quality

TOV is formulated with a balanced combination of high-pro soybean meal and premium animal & marine proteins. Through this formulation, TOV offering a feed that is nutritionally balanced to maintain shrimp health and growth performance. **Suitable for both semi-intensive and intensive systems**, TOV supports consistent productivity while optimizing feed cost efficiency. TOV ensures maintained quality even with an **economical choice**.
